CERTIFICATES

- Getting started with deep learning NVIDIA
- Accelerating end-to-end data science workflows NVIDIA
- Getting started with AI on JETSON NANO NVIDIA
- English for Business and Entrepreneurship PENN University
- Data Analysis Track UDACITY
- Introduction to Human Rights University of Geneva
- MTA Introduction to Programming using Python
- Technical Support Fundamentals Google
- The Foundations of Cybersecurity University of Georgia
- Cisco CCNA 1

ACHIEVEMENTS

- NRW hackathon & Telnet 2021 1st place
- Sup'Com CyberSecurity CTF 2021 1st place
- CSTC Hackathon 2021 3rd place
- IEEE XTREME 2020 Rank: 2nd in SUP'COM, 14th in Tunisia and 351st/2100+ worldwide

PROJECTS

Intelligent car diagnostic unit (on going)

- Continuation of the 1st place telnet hackathon, We continue to develop a diagnostic unit that detects incidents in non-covered areas and sends it to Telnet satellite.

NLP project

- Made an unsupervised model that detects cyberbullying using Tunisian dialect.

Database project

- Built a database for hospitals to best manage their oxygen stock in the pandemic.

Electronics project

- Made the design of an ALU (Arithmetic and Logic Unit)

EXTRACURRICULAR EXPERIENCE

Sup'basket

Chairman

- Motivate Students to Go Into Basketball. We strive to bring on players who desire to play high school basketball.

Sup'Culture

Chairman

- A PAQ-DGSE funded club that aims to help students keep in touch with rich cultural values via a radio station and a media-tech.

Google Developer Student Club - Sup'Com Tunisia

Founder member and ML co-lead

- Developer Student Clubs are university-based community groups for students interested in Google developer technologies.

Sup'event

Public relationships

- Organize travels and events for sup'com students

IEEE Geoscience and Remote Sensing Society

Treasurer

- Work as a team in several projects like exploring news techs together and organize events about geoscience and remote sensing for students.
